Experiment 9

AI and Data Analytics Using Zoho Zia in Zoho Creator

Aim

To implement AI and data analytics using Zoho Zia in Zoho Creator to analyze student admission data, identify trends, and generate predictions.

Procedure

1. Log in to Zoho Creator and choose the option to create an application with Zia (AI app builder).
2. Describe the requirement as a student admission form. Zia suggests the use cases and a data model (Applicant Profile, Academic Record, and Document Upload).
3. Review the suggested use cases and data model, then click Create Application.
4. Open the generated application and review the Dashboard, which shows the Zia-generated analytics: average percentage, total academic records, eligibility checks, document uploads, academic stream counts, and document type charts.
5. Add sample applicant profiles and records so that the dashboard has data to analyze.
6. Open Edit this application and use the Zia Build Agent to modify or extend the application through instructions.
7. Open the Eligibility Check Report and review the eligibility status of each applicant (Eligible, Conditional, or Ineligible) along with the reviewer notes.
8. Study the charts and reports to identify admission trends.
